Maintenance- Logistics-Facilities Report for Santa Clara Fire 9-2021

1. Quotes are out on E116/1203 for air conditioning and will have a date apparatus can go into shop to have the work completed this month. Total \$6,000.00 I have given Hughes the go-ahead on this project.
2. Sprinkler system at station 116: We are replacing both timers so we can start putting out water to shrubs and yard.
3. Both emergency generators have agreement signed for annual maintenance for 2021.
4. Trees at station 116 need to be trimmed, some removed because they are getting too large. New trees will be planted and new bark added this fall.
5. Parking lot seal coating and striping may not occur this year, we've had several delays and they are running behind.
6. Soda machines are leaving and are being returned to Pepsi.
7. Randy and I are considering moving one of the large Conex containers to station 115
