

**LFA & Santa Clara**  
**Board Reports**  
**For**  
**Maintenance – Logistics – Facilities**  
**3/2024**

**Project Updates:**

**Station 101:** Working on budget items for next budget year.

**Station 102:** Moving forward on clean up and organization.

**Station 115:** Asphalt repair on the drill field is being looked into.

**Station 112:** Station furnace is going to be replaced, had a hole in the heat exchanger allowing heat and combustion gases to impinge on side of furnace.

**Station 116: Paving and striping:** RFP will go out this month.

Upgrading WIFI and is completed. We have a quote of around **\$4500.00** to upgrade parking lot lights and I'm recommending we move forward on this project as it will enhance the amount of activities our exterior cameras pick up.

**Station 117:** We are needing to possibly place a small fence around our propane tank.

Our telemetry antenna has been stolen at least twice, this lets us monitor the propane levels, all of our tanks have this. I'm Guessing this to be **\$4500-\$5000**.

Respectfully,  
Captain, Nelson
