## Maintenance- Logistics-Facilities Report for Santa Clara Fire 10-2021

### Door Locks

1. Quotes are out for aligning the district door locks for stations 116-117. What this means is, when codes need to be changed we can do it from one location rather than going to each station individually. Door codes will be standard throughout the district. Groups who use a portion of the facility will have their own code along with vendors who visit the buildings routinely. Door tracking is also done so we know who and what time the door was accessed. The used door locks that were removed during the upgrade will be reinstalled onto the dorm doors at station 116. My estimate for this project is \$9,000. - \$10,000.

### Tree Project at 116

2. Quotes are out to have (3) trees removed, stumps ground and (3) new dog wood trees put in place where the trees were removed. The (3) trees are becoming too large and are starting to uproot curbs and other structures. The large leaf maple trees that hang over from the adjacent school property will be trimmed back as well. My estimate here is around \$7,500 – \$9,000.

### Parking Lot Lighting Upgrade 116

3. Quotes are out for the upgrading of exterior pole lights, as the current ones don't put out enough light. This project is needing consideration due to our resident responders having their personal vehicles parked there overnight now. It also would provide some additional security so the cameras already installed there would better pick up activity that has been occurring at station 116 at night. This project would start after tree trimming and removal. My estimate for this project is \$2500-3500.
4. Parking Lot Lighting Upgrade (117)  
Quotes for lighting upgrades are out for this station as well, I would like to move away from the metal halide lights from an energy stand point and get lights that will run for a longer duration and provide better lighting. My estimate is around \$2500.00- 4000.00.

## Maintenance- Logistics-Facilities Report for Santa Clara Fire 10-2021

### Parking Lot Improvement and Painting 116

5. I have one bidder at the current time that I'm waiting on. Their recommendation was to re-pave the entrance off from River Road as it's in need of repair. It looks like to me it's just the piece that runs towards the school property. After the repair is completed they would repaint and seal the rest of the lot. I don't have an estimate on this work yet.
  
6. Thanks to board member, Graves for removing the brush from the recent tree trimming project to repair the flag pulley and replacing new rope.

Respectfully Submitted,  
Captain Nelson
